

Every Drop Counts

Simple Steps to Save Water

Let your host know if there are any leaking faucets. One drop every 2 seconds from a leaky faucet wastes 2 gallons of water every day. That's water — and money — down the drain.

Scrape, don't rinse. Before washing dishes by hand or in the dishwasher, scrape them; don't rinse first. And, don't let faucets run when washing the dishes.

Run dishwasher only when full. This can eliminate one load of dishes per week and save the average family nearly 320 gallons of water.

Keep a pitcher of drinking water in the fridge instead of letting the tap run until the water is cool.
